

2-5 Absolute Value Practice 1

Graph each equation.

1) $y = |x| - 4$

2) $y = |x + 3|$

3) $y = |x + 4| - 1$

4) $y = |x - 3| + 2$

5) $y = 3|x + 1| - 2$

6) $y = 2|x + 4| + 1$

Sketch the graph of each line. State the slope and y-intercept.

7) $4x - 3y = 3$

8) $2x + y = 3$

9) $y = -2$

10) $3x + 5y = -25$

Write the slope-intercept form of the equation of each line.

11)

12)
